

BATTERY CARE AND SAFETY GUIDELINES

- NEVER OPPORTUNITY CHARGE
- Once charger is connected – do not disconnect for a minimum of an 8 hour period
- Never allow sparks or naked flames in the vicinity of a battery
- Keep metal objects away from the battery
- Ensure the charging area is well ventilated
- Under no circumstances disconnect battery before switching off charger
- Inspect battery leads and plugs
- Always report damaged or faulty batteries and ensure rectification of fault is carried out before use
- Check electrolyte levels daily – electrolyte should be visible 2/3mm above the plates. This is the maximum required
- Only check and top up battery when fully charged
- Use only deionised, demineralised or distilled water
- Only charge the battery once daily with the correct charger
- Always wear protective overalls and goggles

Acid – UN No: 2794

Emergency Contact Tel: 01788 540000

If acid comes into contact with skin or clothing, wash with copious amounts of clean, preferably sterile water and seek immediate medical attention
